PROFESSIONAL SUMMARY

Cloud engineering enthusiast with practical experience building solutions on AWS including compute, storage, serverless, and networking services. Strong foundation in Linux, Python scripting, and scalable architecture design. Currently focused on DevOps practices, automation, and real-world cloud infrastructure. Seeking a Cloud / DevOps internship where I can contribute to engineering teams and continue growing quickly.

CORE SKILLS

Cloud	AWS (EC2, S3, VPC, EBS, Lambda, SNS, Auto Scaling, IAM)
Languages	Python, Bash
Systems	Linux Administration
DevOps	Git, GitHub, CI/CD fundamentals
Networking	TCP/IP, HTTP/HTTPS, Cloud networking basics

PROJECT EXPERIENCE

Serverless Area Calculator — AWS Lambda, Python

Built a cloud function that calculates mathematical areas for students. Implemented request processing, testing, and deployment using AWS serverless architecture.

SNS Notification System — AWS SNS

Created a publish/subscribe messaging workflow sending automated email notifications. Practiced event-driven architecture concepts used in modern cloud systems.

Scalable Web Architecture Lab — EC2, Auto Scaling, Load Balancer

Designed a scalable architecture capable of handling traffic spikes and maintaining availability.

EDUCATION

Higher National Diploma (HND) — Accounting
Kaduna State, Nigeria

CERTIFICATIONS & LEARNING

- Cloud Engineering Training Program
- Preparing for AWS Certifications
- Continuous study of Linux, networking, DevOps and system design

KEY STRENGTHS

- Fast learner and self-driven technologist
- Strong troubleshooting and problem solving
- Passion for cloud infrastructure and automation
- Team collaboration and communication
